PROFILE

Third-year BSc Informatics and Computer Science student with hands-on experience in data analysis, statistical analysis, data visualization, and database development.

Experienced in transforming complex datasets into meaningful, decision-ready insights through data cleaning, exploratory data analysis, statistical methods, visualization, dashboard development, and data storytelling.

Proficient in Python, SQL, Excel, Power BI, and data visualization tools, with experience working on large real-world datasets, relational databases, and data pipelines. Strong ability to communicate analytical findings to both technical and non-technical audiences, with a particular interest in using data to solve practical problems across technology, business, and healthcare.

SKILLS

Data Analysis & Statistics

Python · Pandas · NumPy · SciPy · GeoPandas · Exploratory Data Analysis (EDA) · Statistical Analysis · Data Cleaning · Data Wrangling · Data Validation · Descriptive Statistics · Trend Analysis

SQL & Databases

SQL · MySQL · Relational Database Design · Data Modelling · Database Querying · Data Extraction · Data Management

Excel & Spreadsheets

Excel · Data Cleaning · Data Manipulation · Spreadsheet Analysis · PivotTables · XLOOKUP/VLOOKUP · Conditional Formatting · Charts · Power Query

Data Visualization & Business Intelligence

Power BI · Matplotlib · Seaborn · Dashboard Development · KPI Visualization · Data Storytelling · Choropleth Mapping · Interactive Reporting

Machine Learning

Perceptron · Neural Network Fundamentals · Model Evaluation Basics

Data Engineering & Technology

Firebase Firestore · Firebase Authentication · Firebase Cloud Messaging · Data Pipelines · Git · APIs

Programming & Other Technical Skills

Python · C++ · JavaScript · PHP · Laravel · Swift · SwiftUI · SVG / Visual Design · Technical Documentation

PROJECTS

Global Renewable Energy Trends - Data Analysis

iLab Africa CDAV Capstone · Individual Project · 2026

- Cleaned, transformed, and analysed a 56-year, 104-country dataset on renewable-energy share using Python, Pandas, NumPy, and GeoPandas.
- Performed exploratory and statistical analysis to identify historical, regional, and country-level energy trends.
- Investigated relationships and patterns within the dataset to distinguish renewable-energy growth from changes caused by declining fossil-fuel use.
- Created geographic visualizations and choropleth maps using GeoPandas.
- Developed Power BI dashboards and statistical visualizations using Matplotlib and Seaborn to communicate analytical findings.
- Identified that renewable-share gains in several regions reflected fossil-fuel decline rather than clean-energy growth.
- Presented findings to both technical and non-technical audiences, translating analytical results into clear, actionable insights.

Tools: Python · Pandas · NumPy · SciPy · GeoPandas · Matplotlib · Seaborn · Power BI

Healio - iOS Health Monitoring App

Apple Mobile Development Training Capstone · 2026

- Developed a health insights engine for analysing real-time and historical patient vital-sign data.

- Designed and structured longitudinal vitals data to support trend analysis and alerting.
- Built a Firebase Firestore data pipeline supporting caregiver-patient monitoring.
- Designed the underlying data model for caregiver-patient messaging and historical health records.
- Created a swappable data-source architecture supporting both mock and live data for testing and development.

Tools: Swift · SwiftUI · Firebase Firestore · HealthKit · Data Modelling

Woods Pharmaceuticals - Inventory & Sales Management System

Academic Project · 2024 - Present

- Led requirements analysis for an inventory and sales management system.
- Designed a MySQL-backed relational database schema supporting inventory management and sales reporting.
- Structured data relationships to support accurate storage, retrieval, and reporting of operational information.
- Developed the application using PHP/Laravel 11 for an offline-first LAN deployment.

Tools: MySQL · SQL · PHP · Laravel 11 · Relational Database Design

ML Fundamentals - Perceptron Implementation

Personal Project

- Implemented a perceptron learning algorithm from scratch in C++ to develop a deeper understanding of machine-learning fundamentals.
- Built a JavaScript visualisation tool demonstrating how a decision boundary is learned.
- Documented the implementation and project methodology on GitHub.

Tools: C++ · JavaScript · Machine Learning · Git/GitHub

HEKIMA Health Initiative - Data Visualization

Freelance · 2025

- Translated multi-country programme data from Kenya, Uganda, and Nigeria into a clear SVG infographic.
- Designed visual outputs to communicate programme information effectively to stakeholders.
- Focused on presenting complex programme information in a concise and accessible format.

Tools: SVG · Data Visualization · Visual Communication

EDUCATION

Strathmore University - Nairobi, Kenya

BSc Informatics and Computer Science

April 2024 - Present · Year 3

Relevant coursework: Probability & Statistics · Data Structures · Object-Oriented Programming · Software Engineering · Database Systems · Artificial Intelligence · Operating Systems

iLab Africa, Strathmore University

Certificate in Data Analytics & Visualisation (CDAV)

January 2026 - March 2026

- Analysed global renewable-energy data across 104 countries spanning 1965–2021 using Python, Pandas, NumPy, SciPy, and GeoPandas.
 - Conducted data cleaning, exploratory analysis, statistical analysis, and visualization.
 - Produced choropleth maps and statistical trend visualizations using Matplotlib and Power BI.
 - Developed analytical dashboards and visual reports to communicate findings.
 - Delivered both technical and non-technical presentations synthesising key analytical insights.
-

Apple Inc. & Strathmore University

Apple Mobile Development Training

January 2026 - March 2026

- Designed a health insights engine and real-time Firebase Firestore data pipeline for a caregiver-patient monitoring application.
 - Modelled longitudinal vital-sign data ingested via HealthKit for trend analysis and alerting.
-

PROFESSIONAL EXPERIENCE

Woods Pharmaceuticals Ltd. - Nairobi, Kenya

Pharmacist Assistant

January 2024 - March 2024

- Operated pharmacy management software for prescription processing, payments, and regulated inventory documentation.
 - Maintained accurate operational and compliance records.
 - Supported medication preparation and dispensing while following established procedures.
 - Worked with sensitive operational information while maintaining accuracy, attention to detail, and confidentiality.
 - Developed practical experience working with structured records, inventory information, and technology-supported business processes.
-

CERTIFICATIONS & TRAINING

- **Certificate in Data Analytics & Visualisation (CDAV)** - iLab Africa, Strathmore University · 2026
 - **Apple Mobile Development Training** - Apple Inc. & Strathmore University · 2026
-

INTERESTS

Data Analytics & Machine Learning · Business Intelligence · Health Technology · Data Visualization · Software Development · iOS Development · Creative Writing
