

Sydney Aisha

Full-Stack & iOS Developer | Data Analyst | Swift · Python · Laravel

sydneyaisha4@gmail.com · <https://github.com/syd-xo> · <https://www.linkedin.com/in/sydneyaisha/> · Nairobi, Kenya · <https://syd-xo.github.io/>

SKILLS

iOS Development · Swift · SwiftUI · HealthKit · Firebase(Auth, Firestore, FCM)

Data Analytics · Python · Pandas · Numpy · GeoPandas · PowerBI · Matplotlib

Full Stack Development · PHP · Laravel · MySQL · Blade · Eloquent ORM · Tailwind CSS

Tools & Practices · Git/GitHub

FEATURED PROJECTS

Healio - iOS Health Monitoring App · *Apple Mobile Development* 2026

- Built a production-ready iOS app connecting caregivers and patients with real-time health monitoring
- Stack: Swift, SwiftUI, Firebase (Auth · Firestore · FCM), HealthKit, Xcode - full offline support and App Store freemium model
- Architected HealthKit data ingestion through a protocol-based abstraction layer, decoupling vitals sourcing from UI and enabling future data-source expansion
- Sole developer across the full build cycle: architecture design, UI implementation, backend integration, and testing

Global Renewable Energy Trends - Data Analytics · *Data Analytics & Visualisation* 2026

- Cleaned and analysed a 56-year, 104-country dataset on renewable energy share using Python (Pandas, NumPy, GeoPandas)
- Produced GeoPandas choropleth maps and Power BI dashboards revealing regional fossil-fuel displacement patterns
- Structured the analysis and outputs for two distinct audiences, producing both technical deep-dives and accessible non-technical summaries
- Presented findings to both technical and non-technical audiences; identified key insight that renewable share gains in some regions reflected fossil fuel decline, not clean energy growth

Pharmacy Management System - Full Stack Development · *Client Project, Woods Pharmaceuticals* 2026

- Built a full-stack pharmacy operations platform (Laravel 13, PHP 8.3, Blade, Eloquent ORM, Tailwind CSS, MySQL) with role-based access for Admin, Manager and Staff
- Designed a relational schema and CRUD workflows spanning medicines, suppliers, users, sales, and purchase orders
- Developed transactional sales and purchase-order workflows with auto-generated receipt numbers and real-time inventory updates
- Designed inventory controls for reorder thresholds and expiry tracking, plus sales, inventory, and supplier reporting modules
- Drew on hands-on pharmacy operations experience from a prior role at the client site to inform workflow and feature design

EDUCATION

Apple Mobile Development Training · *Apple Inc. & Strathmore University* 01/2026 - 03/2026

- Intensive iOS development program; built Healio, a full-stack health-monitoring app

Certificate in Data Analytics & Visualisation (CDAV) · *iLab Africa, Strathmore University* 01/2026 - 03/2026

- Applied data analytics and visualisation program; analysed Global Renewable Energy Trends

BSc Informatics and Computer Science · *Strathmore University, Nairobi* 04/2024 - present

- Year 3 | Relevant coursework: Data Structures, OOP, Software Engineering, Probability & Statistics

KCSE Certificate · *Riara Springs Girls High School* 01/2020 - 10/2023

- KCSE grade: B+
- Writer's Guild Club Head

PROFESSIONAL EXPERIENCE

Pharmacist Assistant · *Woods Pharmaceuticals Ltd., Nairobi* 01/2024 – 03/2024

- Supported medication preparation, dispensing, and compliance; operated pharmacy management software for prescription processing and payments
- Delivered front-line customer service and maintained regulated inventory documentation
